MyMarsden patient app and website

MyMarsden is a patient app and website where you can access parts of your Royal Marsden healthcare record from your own computer, tablet or mobile phone.

Benefits of MyMarsden

- With MyMarsden you can view different parts of your Royal Marsden healthcare record at the touch of a button, including your:
 - Appointment times
 - After-appointment summaries
 - Clinical letters
 - Prescribed medication
 - Most test results
- Send messages directly to your healthcare team
- Easily join video appointments
- Complete pre-visit forms from the comfort of your home, reducing the time filling out paperwork in appointments and giving you more time with your healthcare team

Securely share your account

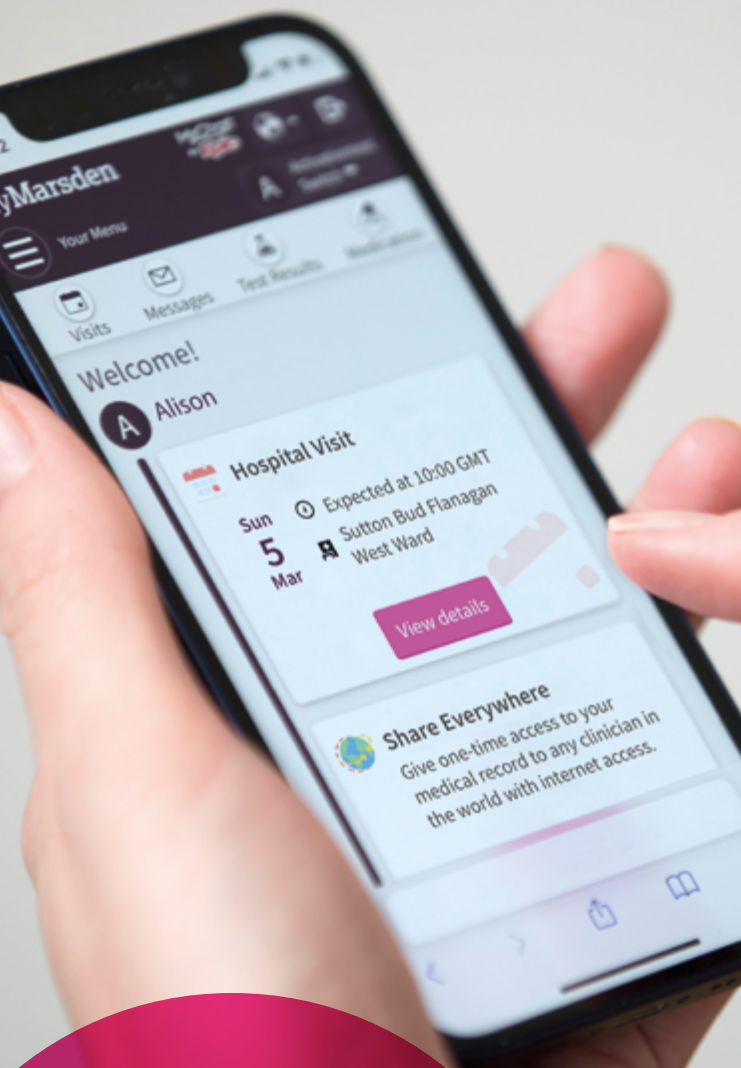

With MyMarsden you have control over who can access your Royal Marsden healthcare record:

- Generate a one-time access code to share your record with healthcare providers outside of The Royal Marsden, such as your GP
- Share your Royal Marsden healthcare record with loved ones or carers – this is called proxy access

Find out more information at:

royalmarsden.nhs.uk/mymarsden

“View different parts of your Royal Marsden healthcare record at the touch of a button.”

Is my information safe?

Yes. MyMarsden protects your personal information through a series of secure usernames and passwords. It uses the most advanced encryption technology available, so that only you and your healthcare team can access your information. Be sure to keep your password private.

How do I sign-up?

You can register for an account, find more information and read frequently asked questions by visiting: **royalmarsden.nhs.uk/mymarsden**
